EXAMINER'S COMMENT

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Nov. 17, 2006 has been entered. In this amendment filed on Oct. 24, 2006, claim 4 has been amended. Accordingly, claims 1-4 are pending in this application.

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1: Applicant's arguments to the claim (presented in the Remarks section filed on May 10, 2006, pages 5-7) have overcome the cited prior art.

Regarding claim 2: the prior art fails to disclose or render obvious the claimed combination including: an oil bore being formed in the rotary shaft, wherein a surface of the intermediate partitioner being adjacent to the second cylinder has a groove extended from an inner periphery to an outer periphery of the intermediate partitioner to provide communication among the oil bore and the insides of the rollers, a low-pressure chamber in the second cylinder, and the hermetically sealed vessel.

Regarding claim 4: As pointed out by applicant on page 5 in applicant's amendment filed on Nov. 9, 2006, the cited references fail to disclose an oil bore being formed in the rotary shaft,

wherein a lubrication bore being formed in the intermediate partitioner for directing communication between the oil bore and a low- pressure chamber in the second cylinder

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of three patents: Tadano et al. (U.S. Patent Number 2003/0068236), Matsumoto et al. (U.S. Patent Number 2004/0071576), and Sugiyama (Publication Number JP 63-162991), each further discloses a state of the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
